Run Med/ Bike Med

"CARDIOMEMORY"

CARDIOMEMORY is the software package which enables users:

- to monitor the most important test and training parameters
- to save and store training results
- to view graphic displays of test and workout trends

CERTIFICATION

Conforms to the sector's most stringent standards.

COMPATIBLE WITH ELECTROCARDIOGRAPHS AND METABOGRAPHS

Use of TRACKMASTER, ERGLINE and C-SAFE communication protocols means MED products are compatible with electrocardiographs and metabographs used to carry out exercise tests and oxygen consumption analysis.

ACCESSORIES:

- Adjustable pedal cranks (Bike)
- Axillary supports (Run)
- Rear step (Run)
- Long adjustable handrails (Run)

EXCITE™
TEMPT YOUR SENSES

EXCITE

Excite™ rediscovered senses, new emotions

MULTISENSORIAL DESIGN™

WANTED ... SENSATIONS

These days, members of health clubs are looking for a more engaging experience. Technogym® has designed the new EXCITE™ line around the individual and their senses. Their interaction with the equipment gives rise to new feelings, total sensations and excellent performance. In brief, a multisensorial experience which will align your club and your members more closely with the concept of wellness.

EXCITE™ GENERATES EMOTIONS, YOU GENERATE BUSINESS

LONG LIFE BALANCE DECK, CUSHIONED IMPACT

Running on a cushioned, elastic surface which absorbs impact and returns the thrust to each step: this is the sensation that Excite™ offers, thus appealing equally to expert runners and people who are just starting out along the road to fitness.

FAST TRACK CONTROL™

Allows you to adjust the intensity level of the exercise without having to interact with a keypad. The Training session is controlled by means of a joystick or a button without leaving the correct training posture.

SMOOTH MOTION, BELT TRANSMISSION

The use of low-noise equipment reduces sound levels in the cardiovascular area of your club and makes training sessions more peaceful and relaxing for your clients. The Bike and Recline belt transmission system makes the movement particularly smooth and quiet.

GOAL ORIENTED DISPLAY, MOTIVATING TRAINING

Training is focused on the achievement of the user's goal: an analogical indicator in the centre of the display enables both user and trainer to control the development of the training session easily and immediately.

WELLNESS TV™, THE ENTERTAINMENT VERSION

So you thought cardiovascular training was boring? Not any more, with EXCITE™! The on board entertainment system, is fully integrated into the product design, which enables you to watch TV and listen to the radio whilst training.

IFI Accredited version available

Wellness in motion™
